

Kremer Pigmente GmbH & Co. KG

Measures Covid 19

With regard to the current situation, we would like to inform you that we are closely monitoring the circumstances and are adapting our measures to the respective situation. Of course, we reduce personal contacts to a bare minimum and adhere to the recommended hygiene regulations.

The following measures have been successfully implemented:

- Our shops in Aichstetten, Munich and New York are closed to the public until further notice
- Internal workplaces have been arranged in such a way that there are no groups or several employees in one place
- Disinfectant was made available to every employee
- Employees are informed at regular intervals about the official guidelines (wash hands, keep distance, etc.)
- Suspected cases are dealt with individually based on the specifications of the official bodies and self-quarantines are carried out if necessary
- Travel restrictions have been implemented
- Work equipment such as forklifts and office furnishings are regularly cleaned and disinfected
- Deliveries and pick-ups at the location are carried out using controlled instructions with appropriate spacing and security measures

You can reach us as usual by email or phone. In Aichstetten we continue to work, adapted to the situation, and ensure the availability of the products for shipping. Supply bottlenecks may occur in the next few months.

We wish the best health to all of our clients and partners and are thankful for the strong solidarity!
