

26800 SET: XSL-Pigments

The pigments easily disperse in water and aqueous binders thanks to a special treatment with dispersing agents.

The XSL-Pigments can also be used for wood stains due to their excellent solubility in water. XSL-Pigments are very lightfast.

Unusual effects can be obtained by sprinkling XSL-Pigment particles onto a wet surface.

Contents of the set,

6 colors in 100 g jars:
