

97800 Textile Adhesion Powder

Description:

A powdered, synthetic filament.

Fields of application:

- Artificial plugs
- patching
- Hemming
- Sewing
- Reinforcing creases
- Mending closure areas without needle and thread.

Application:

Sprinkle textile welding powder evenly and iron in hot (wool, cotton, linen) until powder is completely melted.

Always cover with parchment paper (for delicate fabrics, place parchment paper several times so that the fabric does not burn). Always blow away any textile welding powder that has been sprinkled on top so that it does not stain. Always use aluminum foil as a base.

Please always carry out preliminary tests!
